

In almost all social media platforms, the videos users share are not allowed to be downloaded. It is because downloading people's content puts a lot of extra load on the server and damages privacy and legality. For this reason, it is not possible to download Instagram videos as a default option. Likewise, you cannot download video content on other platforms like YouTube, Facebook, Twitter, etc. Did you ever need to download a video that you enjoy watching on Instagram? Do you need an [**Instagram Video Downloader**](#), which is entirely free to use? Then you are in the right place.

downloading videos from Instagram sounds good. You can do it online very quickly with the Instagram video downloader. Our service is entirely free and 100% safe to use. You can do it entirely anonymously; you do not even have to sign up and become a member of our site. You can download all the videos of that user if you enter the desired Instagram account's username. However, the Instagram account of the person you chose to download their videos must be open to everyone for viewing. Otherwise, you can not download videos of people with protected accounts. It is an essential rule that you should keep in mind.

Some 3rd party applications also offer to download Instagram videos. Most of these applications are paid, so if you need a free solution, those are not for you. Also, remember that many websites or apps that claim to have this feature are scams and can steal your vital information. When you install a third-party app, some security issues can occur. But using the InstaFollowers website is proven to be 100% safe and secure. We concentrate on the quality of the service we offer. We do not collect data or save any of your personal information. In short, our web service is always better and safer to use than another website that you will not be sure of its security or with an application that you have to download on your mobile device (which will use the storage of your phone).

You can find hundreds of websites online and applications in the application markets like App Store or Google Play Store. Some of them may be working with no problems, but usually, a significant portion of them are scams, and it is not a good idea to download them; they can steal all your information, even credit card details, and steal your money. So you can put yourself in danger because of curiosity and trusting to scam apps. Some of the apps are not free to use, so why would you spend your hard-earned money while you could do it for free? With InstaFollowers, there is no need to pay. You may also need to grant some permissions to these applications, and they will usually ask you to be a member of the application (to sign up as a member, you need to give them information about you like your mail address, location, etc. Some shady apps can even ask for more like to be able to access your call logs, messages, etc. Never trust them). That's why we recommend that you always choose to do it online. It is faster and safer.
